

**Time: 1 Hour.**

**1. Create an AD Group with below details:**

Take the following inputs:

- Group Name.
- Group Scope
- Group Category

Create the Group within the OU - **PSTraining**.

2. You want to schedule a PowerShell script to run every night at 2 AM to perform a backup of specific files and folders.

3. Write a powershell script to convert from degree celcius to Farenheit and vice versa.

**\$Fahrenheit = (\$Celsius \* 9/5) + 32**

<b>Menu 1:</b> Celcius to Farenheit
<b>Menu 2:</b> Farenheit to Celcius
If Menu 1 chosen take input for Farenheit.
If Menu 2 chosen take input for Celcius
